Management Information System

The efficient utilization of information, received from various sources and stakeholders in education system leads to correct decision making. Many government agencies such as UGC, RUSA, DBT, and University required data related to students, teachers, non teaching staff and governing bodies. Data required for these and related agencies can be furnished easily with the help of MIS. The intention is to provide administrators and teachers with the information required for planning, policy-making, and evaluation. For the educational institute like colleges, universities, all stakeholders are vital and decision making process should involve benefits to all these stakeholders. The institution has a MIS in the campus for effective and timely management of various services. Student records- The students records like attendance, internal assessment records, university exam records, application of university examinations are managed by MIS. Softwares like Microsoft excel, College management system (CMS), MKCL are used for this purpose.

- Student communication module- For effective dissemination of information related to organization of various activities, parent meets; examination notifications etc. mVaayoo bulk SMS gateway is used. Apart from this social media like whatsapp groups and SMS system is likewise utilized according to necessity.
- Admission process- Admission process is carried out using softwares like CMS, MKCL and other online resources provided by Punyashlok Ahilyadevi Holkar Solapur University, Solapur.
- Placement records of students every year is maintained by placement cell using Microsoft Excel and Microsoft word.
